With experience in both software development and teaching, I can handle technical tasks and communicate ideas clearly. Involved in project work, classroom activities, and adapting to various work environments.

## Experience

---

### Instructor

Oct 2025 - Feb 2026

*Riphah International University, Islamabad*

- Taught core programming and software development subjects, including Object Oriented Programming (OOP), Data Structures, and Computer Networks to undergraduate students.
- Guided students in developing programming assignments, debugging code, and applying software engineering best practices through hands on projects and practical labs.
- Designed technical course materials, coding exercises, and assessments to strengthen problem-solving, analytical thinking, and programming skills.

### AI Intern

July 2025 – Oct 2025

*Riphah International University, Islamabad*

- Worked on an AI focused project, supporting planning, development, and execution of key project tasks.
- Assisted with research, documentation, and coordination to ensure smooth project progress and timely completion.

## Projects

---

### WatchWise – AI Powered Employee Monitoring System

- Designed and deployed a **real time computer vision system** using OpenCV and CNN models to analyze workplace behavior with >90% accuracy.
- Built a responsive React and Flask web app with MongoDB backend and cloud storage for secure logging.
- Interactive dashboards delivered that reduce the manual monitoring effort by ~70%.

*Tech Stack: Python, OpenCV, Deep Learning (CNN), React, Flask, MongoDB, WebSockets, JWT*

### Sports App – Real Time Team Management Platform

- Developed a full stack web app enabling team coordination, event scheduling, and real time match updates.
- Integrated role based access control and notifications, improving communication efficiency by 60%.
- Optimized backend with Node.js and MongoDB for scalable performance.

*Tech Stack: React, Node.js, Express.js, MongoDB, WebSockets, JWT*

### Cleaning App – Android App for On Demand Services

- Built an Android app offering home & vehicle cleaning services with user friendly booking and tracking.
- Implemented efficient SQL based backend, reducing booking latency by ~40%.

*Tech Stack: Java, Dart, SQL, Android Studio*

## Education

---

**BS in Computer Science** 2021 – 2025

Riphah International University, Islamabad

GPA: 3.98/4.00

Relevant Coursework: Artificial Intelligence, Machine Learning, Computer Vision, Deep Learning, Data Structures, Web Engineering, Mobile Application Development

**FSc Pre-Medical** 2018 – 2020

Aslam Model College, Rawalpindi

Grade: A

Relevant Coursework: Physics, Biology, Chemistry

## Certifications

---

- AI For Everyone – DeepLearning.AI
- Machine Learning with Python – IBM
- Web Development in React.js – Coursera
- Android Programming for Beginners – Coursera

## Technical Skills

---

**Programming:** Python, Java, JavaScript, C++, SQL, HTML, CSS

**AI/ML Frameworks:** PyTorch, TensorFlow, OpenCV, Scikitlearn, Hugging Face

**Frameworks & Tools:** React, Node.js, Flask, Express.js.

**Databases:** MongoDB, MySQL

**Cloud & DevOps:** vercel , Docker (basic)

**Other:** WebSockets, JWT Authentication
